Presentation

As a highly motivated graduate in software engineering, I am eager to leverage my comprehensive skill set in real-world scenarios. I possess a strong adaptability to new teams, technologies, and tasks, coupled with a genuine enthusiasm to make meaningful contributions to a dynamic company. My proficiency spans across languages such as Java, C#, and JavaScript, and I am excited about the prospect of continuous learning and growth through a compelling opportunity.

Studies

Liceo Santa Gertrudis
(2013 – 2017)
Bachiller en Educación Media.

Instituto Nacional de Aprendizaje
(2018 - 2019)
Técnico en Inglés para servicio a la Clientela.

SCRUMstudy
(2023)
Scrum Fundamentals Certified
Credential ID 961542

Universidad Tecnológica Costarricense
(2020 – 2024)
Bachillerato en Ingeniería en Sistemas Computacionales.

Important skills acquired:
- Full-cycle application management: Proficient in overseeing projects from initial design and development through deployment and ongoing maintenance.
- Strong grasp of core programming concepts including algorithms and data structures.
- Diverse framework and programming language exposure: Skilled in utilizing C# .NET, JavaScript, Java, HTML, CSS, and React.js.
- REST API Development: Experienced in both creating and consuming REST APIs.
- Database Design and Management: Proficient in designing and maintaining relational databases such as SQL Server and MySQL.
- Version Control: Proficient in using GIT for effective collaborative development.
- Proficient in Agile methodologies, specifically SCRUM.
